All these products are sold well in American and European market and we have worked with many famous brand of USA and European

1. Product Introduction of the Ribbed Rubber Horse Bell Boots

Bell boots, sometimes called overreach boots, cover a horse's front feet from the pastern over the coronary band and the hoof wall down to the heel. Bell boots provide protection from interference from the hind feet, which can overreach or clip the front feet during riding or turnout. Bell boots are usually worn to prevent overreaching (when the horse "grabs" his front heels with the toes of his back feet, resulting in injury), or if the horse is wearing shoe studs, to protect him from accidentally injuring itself with the stud of the opposing hoof. The size for a horse bell boots are available from XS to XXXXL. The shape can be customized according to your market. All the fashion color can be easy reach by offering us a simple color sample or just tell us a Pantone Code. countries.

We choose good quality rubber material for all the rubber horse bell boots, we offer the following standard rubber materials in a range of durometer (Shore A) hardness to satisfy practically any service condition. These materials are most common, but we do offer the ability to provide custom compounds of most rubber elastomer types: Natural Rubber, EPDM, Silicone and PVC

2. Product Parameter (Specification)

Product Name:	Ribbed Rubber Horse Bell Boots
Material:	NBR, HNBR, EPDM, SILICONE, VITON, FLS, FFPM, PTFE
Size:	Any size, Customized/standard and nonstandard

Color:	Any Color
Packing:	plastic bag&carton box or according to your requirements
Sample time:	20-25days
Application:	Horse
Warranty:	2years

3. our service.

1. Inquiry about our products can be replied within 12 hours.
2. Professional & experienced staff help you solve problems of silicone and rubber products.
3. Accept customized shape, material, hardness, temperature, size, color, logo and packing.
4. Mode of production: Compression or injection or extrusion.
5. We have a comprehensive range of in-house manufacturing facilities, allowing us to provide fast and effective manufacturing.

4. Quality Control and Certifications

We serve our customers with high quality Customized Shape Rubber Gaskets by strictly follow ISO 9001:2015 and IATF 16949.

6. FAQ

1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.
Xiamen Liangju Rubber Technology Co., Ltd.

2. If OEM is acceptable?

Yes, Samples are Free of charge

3. What Is EPDM Rubber ?

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

4. Why is rubber used to produce industrial products?

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

5. Which type of rubber is best for my application?

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
